

The logo for GreenStream features the word "GreenStream" in a white, sans-serif font. A white curved line arches over the "Stream" portion of the text. The background is a vibrant green with diagonal streaks of light and dark green, creating a sense of motion and energy.

GreenStream

GreenStream Network is a leading Northern European actor in the carbon and renewable energy markets, with offices across Europe and in China. Established in 2001, GreenStream is one of the forerunners in the business. We develop and manage investment vehicles and provide a variety of advisory and intermediary services. GreenStream Network is authorized and regulated by the Finnish Financial Supervision Authority (FIN-FSA).

Green Investment

The carbon and renewable energy markets provide exciting new investment opportunities. GreenStream develops, establishes and manages funds and other investment vehicles that invest in renewable energy and carbon commodities and projects. GreenStream has outstanding experience and expertise in identifying, assessing, developing and managing high-quality projects, including Joint Implementation (JI) and Clean Development Mechanism (CDM) projects under the Kyoto Protocol.

Current investment vehicles under management:

Blåfall

- builds and operates small-scale hydro power plants in Norway

Multilateral Carbon Credit Fund (MCCF)

- EBRD's and EIB's carbon fund
- GreenStream is the Carbon Manager for the North-Eastern area covering Belarus, Kazakhstan, Russia and Ukraine

Fine Carbon Fund

- acquires carbon credits for its investors with focus on CDM projects

Nordic Carbon Fund

- purchases CERs for Northern European investors

Climate Services

Advisory Services

GreenStream provides multi-disciplinary advisory services to public and private organisations on environmental trading schemes, energy commodity markets and related policy and legislation. We design customised carbon and renewable energy business strategies, offer market and policy analyses, and provide expertise for project development and management. With GreenStream's professional support, our clients are able to identify, optimize and tap into the benefits and business opportunities of the carbon and renewable markets. GreenStream was nominated Runner-Up in the EU Emissions Trading Scheme Best Advisory category in 2006 by readers of the Environmental Finance magazine.

Intermediary Services

GreenStream acts as a broker and portfolio manager in the carbon and green certificate markets, covering all climate-related commodities (EUAs, ERUs, CERs, carbon offsets), green certificates and electricity certificates. As a pioneer in the environmental markets, GreenStream has brokered several ground-breaking transactions, including the first financial deal with EU emission allowances in Europe. GreenStream is the leading broker of green and carbon-free energy certificates in Europe and it has been elected the Best Green Certificate Broker of the Year in 2004, 2005, 2006 and 2007 in non-UK Europe by the readers of the Environmental Finance magazine.
